

Extra Credit Homework

Discrete Structures 1/2

due: 27 April 2023, 8:00am

You can receive extra credit by creating practice test questions, one for each chapter covered in detail the course (Chapters 2, 3, & 4 for Discrete 1, Chapters 5, 9, 11, & 6 for Discrete 2).

You should:

- clearly identify the concept you're testing,
- provide the question itself,
- then also provide an answer.

You will only receive credit if your question is unique (i.e. is not the same as one of your colleagues and not from the book), and is non-trivial.
